

GET PAID FASTER!

Here are a couple of quick tips to show how you can use the new functionality on your Sage system to spend less time chasing cash and waiting for customers to pay you:

Business-to-Consumer (B2C)

Turning on the Sage Pay functionality turns your smart phone into a card machine allowing you to take payment straight from debit & credit cards.

For customers that pay on credit terms it adds “Pay Now” buttons to your invoices - which customers simply click on to settle.

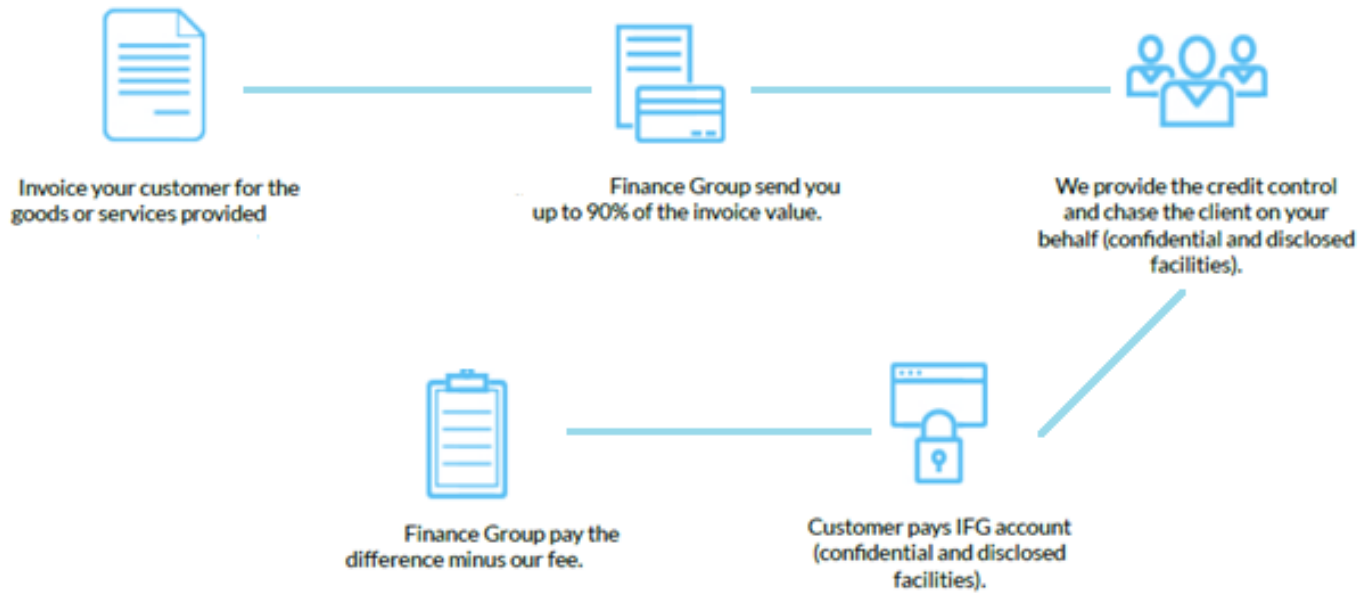

This video shows how it works:

Business-to-Business (B2B)

We have developed a solution where you can export your accounts receivable list from Sage and receive 90% of the cash value of outstanding invoices within 24 hours. Our partners assume the role of your Credit Control department, contacting your customers to ensure they pay to the credit terms provided. Once the customer has paid - they release the balance, less fees (3% on open book).

Here is how it works:

Let me know if you would like us to set-up either of these solutions for your business.
